

Messi Amour

Full-Stack Developer & Tech Entrepreneur

Brazzaville, Republic of Congo · messiamour034@gmail.com · github.com/messi-amour

PROFILE

Self-taught full-stack developer, currently in his first year of a Computer Science degree (L1, IGT). Designs, codes and deploys complete products solo, from architecture to production: a conversational AI assistant (MESSIA) and a school management SaaS platform (SmartSchool Africa). Looking for an internship, freelance mission or product collaboration to put that ownership to work for a team.

PROJECTS

MESSIA — Conversational AI Assistant

2026 · in beta testing

Conversational assistant built solo: real-time streaming, four personas, function-calling web search, conversation memory, WhatsApp Business integration. End-to-end serverless architecture.

Node.js · Groq (Llama 3.3 70B) · Supabase · Tavily · Render

SmartSchool Africa — Multi-Tenant SaaS Platform

2026 · in development

School management platform for institutions across Central Africa: per-school data isolation, automatically generated PDF report cards, grade and enrollment management. Backend validated across six modules; React frontend in progress.

Django 5 / DRF · PostgreSQL · React / TypeScript · Tailwind CSS

EDUCATION

L1 Computer Science — IGT	2026 · ongoing
Intensive Programming Training — ACSI	2025 · 6 months
High School Diploma (Baccalauréat)	2024 · obtained

TECHNICAL SKILLS

Languages: Python, JavaScript, SQL, HTML/CSS, C++
Frameworks & tools: Django / DRF, React, Node.js, Tailwind CSS
Infrastructure: Supabase, PostgreSQL, Render, Git/GitHub, API & AI integration

LOOKING FOR

Full-stack developer internship · Freelance mission · Product / startup collaboration — available immediately, Brazzaville or remote.
