PROFILE

Computer science student at IGT (Year 1 completed, Year 2 starting November 2026) and self-taught full-stack developer, founder of MESSIA, a conversational AI assistant now live in beta, and of SmartSchool Africa, a school-management SaaS platform in development. I use AI as an acceleration tool while understanding every part of the code I ship. Looking for freelance missions and product collaborations; available immediately, on site or remotely.

TECHNICAL SKILLS

- **Languages:** Python, JavaScript, TypeScript, SQL, HTML/CSS, C++
- **Backend and data:** Node.js, Django REST Framework, PostgreSQL, MongoDB, Supabase (authentication, RLS)
- **AI:** LLM API integration (Groq, Llama 3.3 70B), function calling, real-time streaming (SSE), web-augmented search (Tavily), AI-assisted development
- **Tools and deployment:** Git, GitHub, React, Tailwind CSS, PWA, Render

PROJECTS

MESSIA — Conversational AI assistant

Founder and developer | 2026, live (beta)

- Designed, built and deployed a French-language AI assistant: adaptive personas, web search through function calling, real-time streaming, conversation memory, voice input.
- Set up a three-tier freemium (guest, registered, premium) with quotas tracked in Supabase and an upgrade path to the premium plan via WhatsApp.
- Live since late June 2026, beta-tested by around ten users; Groq inference up to ~300 tokens/s, first token in under 200 ms.

  Stack: Node.js, Groq, Supabase, Tavily, Render

SmartSchool Africa — Multi-tenant school-management SaaS

Founder and developer | 2026, in development (not public)

- Designed a platform for schools in Central Africa, with per-school data isolation and role-based JWT authentication.
- Django REST Framework backend validated across six modules (accounts, schools, academics, students, grades, automatic PDF report cards); React interface being connected, with a demo mode.

  Stack: Django REST Framework, PostgreSQL, React, TypeScript, Tailwind CSS

Factura — Invoicing and payment tracking for SMEs

Founder | Upcoming (2026)

- Invoicing tool in FCFA with payment tracking for SMEs and freelancers in Central Africa; specification finalized, MVP in preparation.

MADigital — WhatsApp order pages for local businesses

Freelance developer | 2026, offer launched

- Offer of mobile pages for small shops: menu or catalogue with prices, Order button sending a ready-written WhatsApp message, WhatsApp Business set up, QR code; delivered within 72 h.
- Live example page: madigitalcg.netlify.app

  Stack: HTML/CSS, JavaScript, mobile-first

EDUCATION

- Year 2, Computer Science — IGT (Institut de Gestion et de Technologie), Brazzaville | enrolled, starting November 2026
- Year 1, Computer Science, Artificial Intelligence track — IGT, Brazzaville | 2025 — 2026, completed
- Intensive programming training — ACSI, Congo | 2025 (6 months)
- Baccalauréat, Series C (Mathematics) — Complexe Scolaire Bilingue Light World School, Congo | June 2024

LANGUAGES

French: native (with Lingala) · English: intermediate
