SKILLS

Languages
Python · JavaScript · TypeScript · C · C++ · HTML/CSS

Frameworks used
Django / DRF · React · Tailwind CSS

Tools & platforms
Node.js · Supabase · Render · Git/GitHub

Databases
Microsoft Access (tables, queries, forms and reports)

AI & method
AI-assisted development · LLM APIs · Function calling

LANGUAGES

French — Fluent

English — Intermediate

INTERESTS

- Chess
- Creative writing
- Tech entrepreneurship in Africa

MESSI AMOUR

AI-assisted full-stack developer

Tech entrepreneur · Computer science student · Freelance missions

PROFILE

Self-taught computer science student and tech entrepreneur, I design complete web products on my own, from architecture to production, developing with the help of AI. I offer my services as a **freelancer** and am preparing to **continue my studies with a Bachelor's degree in Computer Science in France (Year 2)** in order to strengthen my theoretical foundations and build useful solutions for the African market.

PROJECTS

MESSIA — Conversational AI assistant

2026 · beta test

Conversational assistant in French built solo: real-time streaming, four personas, web search through function calling, conversation memory and WhatsApp Business integration. Serverless architecture from end to end.

Stack: Node.js · Groq (Llama 3.3 70B) · Supabase · Tavily · Render
Link: messia-v1-0.onrender.com

SmartSchool Africa — Multi-tenant SaaS

2026 · in development

School management platform for institutions in Central Africa: per-school data isolation, automatically generated PDF report cards, grade and enrolment management. Backend validated across six modules, frontend in progress.

Stack: Django 5 / DRF · PostgreSQL · React / TypeScript · Tailwind CSS

FREELANCE SERVICES

- Full-stack web application development (Django, React, Node.js)
- Showcase websites for small businesses and entrepreneurs
- Chatbots and AI assistants, WhatsApp Business and third-party API integration
- SaaS platforms: multi-tenant architecture, PDF document generation

EDUCATION

Computer Science, Year 2 (L2) — IGT — 2026
Institut de Gestion et de Technologie, Brazzaville · enrolling in November 2026

Computer Science, Year 1, AI track — IGT — 2025 – 2026
Year completed

Intensive programming training — ACSI — 2025
6 months

Baccalauréat — Series C (Mathematics) — 2024
Obtained · June 2024 session · CS Bilingue Light World School

STRENGTHS

- **Autonomy:** I design the architecture and lead complete products on my own through to production, with AI as a development tool.
- **Entrepreneurial spirit:** founder of MESSIA and SmartSchool Africa, two products taken from idea to beta.
- **Local roots:** solutions designed for the realities of schools and businesses in Central Africa.
