

MESSI AMOUR

Computer Science Student | Full-Stack Developer — Seeking Work-Study / Internship

Brazzaville & Pointe-Noire, Congo · +242 065 48 73 36 · messiamour034@gmail.com · github.com/messi-amour · messi-amour.github.io/portfolio

PROFILE

First-year Computer Science student at IGT, self-taught full-stack developer specialized in web development (Node.js, React, Django/DRF) and AI-based solution integration. Author of two SaaS products currently in development — a conversational AI assistant and a multi-tenant school management platform. Interested in fintech topics. Looking for a work-study contract or an internship to put these skills to work for a technical team.

EDUCATION

Computer Science Degree — Year 1 IGT (Institut de Gestion et de Technologie) — Brazzaville, Congo	2026 — in progress
Intensive Programming Training ACSI — Congo	2025 (6 months)
High School Diploma (Baccalauréat) Complexe Scolaire Bilingue Light World School — Congo	2024

PROJECTS

MESSIA

Node.js · Groq (Llama 3.3) · Supabase · Tavily API

- Built a French-language conversational AI assistant with a three-tier freemium system (guest, free account, premium) with real-time quota tracking.
- Integrated function-calling web search, real-time streaming and voice command; designed five adaptive conversational personas.
- Built an admin dashboard to track users and quotas.

SmartSchool Africa

Django REST Framework · PostgreSQL · React · TypeScript · Tailwind CSS

- Designed a multi-tenant school management SaaS for African institutions, with per-school data isolation.
- Developed six validated backend modules: user accounts (role-based JWT authentication), schools, academic management, students, grades, and PDF report card generation.
- Built a React interface with an interactive demo mode and role-based dashboards.

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, SQL, HTML/CSS, C++
Frameworks & Tools: React, Node.js, Django REST Framework, FastAPI, Tailwind CSS, REST APIs
Databases & Infra: PostgreSQL, MongoDB, Supabase, Render
Artificial Intelligence: LLM API integration (Groq), function calling, augmented web search
Tools: Git, GitHub, Docker

LANGUAGES

French: Native (alongside Lingala)
English: Technical / reading
